

# H1N1 VACCINATION CLINIC SCHEDULE

Updated 11-03-09

The following clinics are for people at higher risk for getting or having complications from the H1N1 flu. Over the next weeks and months, as regular shipments of vaccine continue to arrive, there should be enough vaccine for anyone who wants it.

If you can – please get the H1N1 vaccine from your doctor or regular medical provider. Kaiser members should call the Kaiser flu shot hotline at 1-800-573-5811.

Public vaccination clinics for the following groups will be held on November 7, 15, and 21 from 9:30 a.m. to 3:30 p.m.

- Pregnant women;
- Children and young adults between the ages of 6 months and 24 years;
- People who live with or provide care for infants under six months;
- Adults between the ages of 25 and 64 years who have medical conditions that put them at higher risk for flu-related complications; and,
- Healthcare and emergency medical services workers.

Because the vaccine supply is so limited at this time, it is important that persons not belonging to one of the groups above wait to be vaccinated so that those at highest risk of severe illness can get the vaccine.

Once the demand for vaccine for people at highest risk has been met, the Public Health Department and local providers will begin providing the vaccine to all others who want it. It is important to remember - this is the beginning of a long vaccination effort. We thank you for your patience and understanding.

**Clinic locations, days, and hours may change based on the vaccine's availability and public demand. Please check [www.sccphd.org/h1n1flu](http://www.sccphd.org/h1n1flu) for weekly updates to clinic schedules.**
